About Us

Kalkan Agriculture Ltd. is a family company, established by Ender Kalkan in 2007. Akşehir is the main red fruit area of Turkey. Our first activity is exporting fresh Fruits. And in 2011 we start our first IQF line and start exporting IQF fruits and Vegetables All over the world.

We have two factories in the same area for the IQF Frozen Fruits and Vegetables, The first is 5.000 square meters and the second factory which started its production in 2017 has a 9.000 square meter covered area. With the last IQF (4 the IQF Tunnel) and storage investment total freezing capacity reached 16 Tons/Hour and storage capacity reached 22.500 tons.

How We Do

We offer a wide variety of dried fruits to customers, with the promise to contain the fruit's original fresh aroma and the perfect sweetness. We provide fresh, dried fruit, which is quality-infused in a solution of natural, tastefully concentrated (Organic) apple juice, or prepared and placed in a neutral (Organic) sugar solution.

Processed
Dried Fruits

Organic

And

Using natural osmosis, the fruit absorbs sweetness. Then the fruit is dried in a gentle process, so the finished product has soft and juicy consistency as well as a rich and intense taste. The dried fruits are produced in collaboration with selected suppliers who are specialists when it comes to preserving the fruit's own unique colour and experience of fruit quantities/measures.
